PROFILE

Software technician with experience building and deploying production level applications, maintaining computer systems, and configuring network services. Proficient in JavaScript, and experienced with large data sets and API integration. Outgoing, communicative, works well in teams, and strives to meet or exceed goals.

EXPERIENCE

PROJECT MANAGER, 2022

Software Engineering, Florida International University

- Led team throughout software development life-cycle of simulated application from planning to testing using agile methods to track progress and manage workloads
- Identified risk analysis and assessed uses cases using dynamic models and sequence diagrams
- Designed interfaces implementing UX/UI principles using Axure PR and Figma

DIRECTOR OF PROPERTY MANAGEMENT, 2017 - current

SGS PROPERTIES, Ft. Lauderdale, FL

- Created full-stack web application using React and NodeJS to manage finances and communicate with tenants
- Utilized APIs to retrieve MLS listings and nationwide market rental rates by zip code

PROJECTS HIGHLIGHTS

PORTFOLIO: https://sujithvarughese.com

- Redux toolkit, reducer, and context API
- App store/Google Play publishing using React Native & Expo
- Authorization using Google Firebase OAuth2.0 and JWT
- OpenAI API for returning personalized accurate results
- Testing and deployment to Cloudflare production servers
